

**31.** A system of the type described in Claim 26 wherein the picture is a picture taken previously and stored in memory.

**32.** A method of displaying information to a vehicle driver comprising the steps of:  
determining the position of the vehicle;  
finding a picture of the intersection based on the position of the vehicle;  
displaying the picture of the intersection on the windshield of the vehicle so that the driver can see the picture while looking out the windshield.

**33.** A method of displaying information including the steps of Claim 32 wherein the step of finding a picture includes the step of retrieving a stored picture of the intersection from memory.

**34.** The method of displaying information including the steps of Claim 32 wherein the step of finding a picture includes the step of receiving a live picture of the intersection.

**35.** A method of displaying information including the steps of Claim 34 wherein the step of finding a picture includes the step of receiving a live picture from a camera mounted above the intersection.

**36.** A method of displaying information including the steps of Claim 32 wherein the step of displaying a picture of the intersection further includes the step of adding driving instruction to the display.
